PROFESSIONAL SUMMARY

B.Tech ECE student with a strong interest in Machine Learning, Data Analytics, and AI-driven problem solving. Skilled in Python, SQL, and data analysis, with hands-on experience developing computer vision and machine learning solutions for real-world applications. Passionate about leveraging data and AI to build impactful and scalable solutions.

EDUCATION

Course	College/University	Year	CGPA/%
B.Tech (ECE)	Jaypee Institute of Information Technology, Noida	2023–2027	7.98/10
Intermediate	Sunflower Convent School, Ghazipur (CBSE)	2022	91%
High School	Sunflower Convent School, Ghazipur (CBSE)	2020	94%

TECHNICAL SKILLS

- **Programming:** C++, Python, SQL
- **AI/ML:** Machine Learning, Data Analysis, Computer Vision, Generative AI (Beginner)
- **Libraries:** NumPy, Pandas, Matplotlib, OpenCV, Scikit-learn
- **Tools:** Git, GitHub, Google Colab, MATLAB, Figma, Canva

PROJECTS

- Smart Traffic Signal System** Feb 2026 – May 2026
(Python, YOLOv8, OpenCV)
 - Developed a custom YOLOv8-based traffic monitoring system capable of detecting vehicles, pedestrians, emergency vehicles, and mobility-impaired individuals in real time
 - Trained and evaluated the model over 50 epochs, achieving 89% precision, 87% recall, and 91% mAP on the validation dataset.
 - Validated model performance using confusion matrix analysis and integrated adaptive signal control logic with dynamic 5–15 second traffic signal allocation.
 - Implemented emergency vehicle prioritization and extended crossing support for wheelchair and crutch users, improving inclusivity and safety.
- Phishing Detection System** Mar 2026 – April 2026
(Python, Machine Learning, Flask)
 - Developed a phishing detection system to identify malicious URLs using machine learning techniques.
 - Implemented feature extraction on URLs and trained classification models for accurate prediction.
 - Built a simple web interface for real-time URL checking and user alerts.
- Smart Attendance Tracking System** Jan 2026
(Python, OpenCV, Face Recognition)
 - Developed an automated attendance system using face recognition for accurate student identification.
 - Integrated camera-based real-time detection to mark attendance instantly and reduce manual effort.
 - Generated digital attendance records with date-time logs for easy monitoring and reporting.

CERTIFICATIONS

- **Oracle Cloud Infrastructure AI Foundations Associate (2025)** — Industry-recognized certification covering cloud computing fundamentals, AI concepts, and OCI services.
- **Infosys Springboard – Artificial Intelligence Fundamentals** — Trained in core AI concepts including machine learning basics, data handling, and real-world AI applications.
- **Cloud Computing Bootcamp (CDAC)** — Hands-on training on cloud architecture, virtualization, deployment models, and real-world cloud infrastructure concepts.

POSITION OF RESPONSIBILITY

- Creativity and Innovation Cell in Electronics (CICE), IIIT** Noida, UP
Digital Head 2025 – Present
 - Led digital branding and promotion of technical events across multiple platforms.
 - Managed social media strategy, improving student engagement and online visibility.
